

The Super HERO Code™

Unlocking Our Super Hero DNA

The Map + The Tools = The Code

PUTTING THE WISDOM BACK INTO WORKSHOPS

Super Hero Code Workshop

Award Winning Author, Susie Anthony and her Guest Mentor invite you to learn about the wisdoms and the power of Conscious Mythical Living. Legendary Psychiatrist Dr M Scott Peck saw this as the 'key to world salvation'. The Super HERO Code is all about HOW TO go about healing our personal and collective traumas – and HOW everyone can fulfill their highest purpose and step into their empowered wholeness to thrive!

"Simply put, The Super Hero Code inspires! Over the years I have become less and less interested in dialogue that increases controversy and separation, which appears to be the path of most mainstream media, and more interested in conversations and experiences which inspire people to soar above the mediocrity and false beliefs, that cause limitations."

"In short, the Super Hero Code shows people what is possible within and around them. It is not so much about the super heroes themselves, but the super hero qualities we can all reconnect to within each of us. I believe that as a Psychologist much of my purpose is to help the world wake up from a slumber that is quite dangerous, so pioneering the field of Inspirational Psychology is essential, and The Super Hero Code based on a synthesis of super hero code teachings created by Susie Anthony joins me on the forefront of this new and important field."

Super Hero Code How To...

Unlocking and understanding the Super Hero Code... some will take all the necessary risks and make the essential sacrifices to live this and others will deny it, and continue living in a fantasy world as children in adults clothing! Sure there may be those who are fearful of the ancient past and would like these wisdoms to remain dead and forgotten, and by having the courage to figure out – why... you need not be one of them! As we commit to growth, eventually, there will come a day too when we no longer need mentoring, we have become our own mentors and thus can mentor others – it doesn't get better than that.

The Super Hero Code is all about an on-going process of dedication to reality at all costs. The cost referred to here is the cost of the growing pains we must all bear when we give up cherished illusions in favour of what is real.

Working with the Super Hero Code is like entering a time warp containing all kinds of forgotten higher knowledge and lost secret wisdoms. It's about hard facts too, with connections to the most potent super hero figures in all history – fiction and non-fiction! Using this information we are mentored in terms of how we can all consciously invoke our genius and how to use this for the greatest good. It doesn't get better than that.

You see, once upon a time there was an era when a few people truly believed in the concept of heaven on earth... a dream that most religions didn't offer the common people... you and I... a time before churches, before temples, priests and priestesses, before guilt, sin and confession, inquisitions and holy wars. The Super Hero Code is stripping away all that so we can reach the essence of what a super hero called Christ for instance taught and lived – according to the secret gospels. It's the idea that individuals can take charge of their own lives and destiny – seeking, finding and creating pure love, joy and beauty on earth. This is the idea behind the teachings of the Super Hero Code and it really doesn't get better than that!

Unlocking our Super Hero Code DNA... the map of the super hero code

The Belief:

Everyone has super hero DNA and our role is to help you unlock it.

The Dream:

Introducing you to mentors and providing the map and necessary tools to help you on your super hero journey.

The Passion:

Inspiring super hero qualities and super hero code living in all of us. Building authentic super hero community - helping people to understand that one person can change the world.

How is this achieved?

The Gifts

Truth disturbing complacency, Knowledge displacing ignorance, Power overcoming inertia...

The Promise

Waking you up to become your super hero best self, because super heroes always know which bridges to cross and which bridges to burn... and how cool is that?

The Map is the skeleton of the code... the Tools are the flesh and blood of the code.

Being mentored to use the tools to live the map of the code ensures we all go through the personal transformation necessary to free ourselves from the limiting issues of our anti-hero past, which block true super hero genius and greatness... the code contains vital keys to healing the original wound in the collective minds and hearts of rejection, abandonment, betrayal, loss and scarcity.

'Legendary scholar, author and mentor to film-maker George Lucas, Joseph Campbell said,

"The only myth that is going to be worth talking about in the immediate future is one that is talking about the planet, not this city, not these people, but the planet and everybody on it. And what it will have to deal with will be exactly what all myths have dealt with – the maturation of the individual, from dependency through adulthood, through maturity, and then to the exit; and then how to relate this society to the world of nature and the cosmos... And until that gets going, you don't have anything."

What Campbell's work was advocating was that we all study ancient myths and legends in order to learn how to become our best selves – our super hero selves. The Super Hero Code to quote Campbell 'gets us going' in terms of how to bring alive the teachings of 'conscious mythical living'. Myths are stories that are found in every culture. Often they are fleshed out in different ways in different cultures, but nonetheless the reason we find that same myth in culture after culture, age after age, is precisely because it embodies some great truth – virtually always about human nature. Because myths have much to teach us about human nature, they can be extremely useful for understanding ourselves. This is what the Super Hero Code is all about – the Map and the Code combined take 'mentoring' to a whole new holistic level. The resurrection of the teachings within these ancient myths and stories contained within the Code heralds the end of complacency and ignorance, the old broken down way of existence, which hasn't worked.

Learning to understand and apply the teachings of the Super Hero Code heralds the return of another much better way of living accessed through higher self-knowledge, alignment to service, a return to love, the gift of all this being higher purpose and greater meaning in our lives. The Super Hero Code online interviews and workshops are ultimately all about how to make the change from 'me-thinking to we-thinking' as we learn how to transform by understanding and applying the wisdoms of all kinds of myths both ancient and modern. Much of this mythical wisdom is being regurgitated today even and especially in modern day comic book super-heroes – believe it or not. Without exception, we are all of us personally and collectively entering the white water rapids of conscious human evolution. Discover here the Map and the Code... all the keys of how to manage this unprecedented leap in consciousness effectively and efficiently with minimal stress.

Over the years I have gone through many diverse life and death type trials, setbacks and formidable ordeals to fight and tame my dragons, to follow my passion and find my bliss... I could never have survived without applying the wisdoms of the Super Hero Code.

I have written an award winning book about this ('A Map to God') and far from being ignored by the national media, it was featured on ITV This Morning. It's been suggested that this book would make an ideal manual for anyone interested in super-hero living! The book contains an ancient alchemical map of awakening... and the keys to interpret the map... like the Super Hero Code, it's an outstanding synthesis of 'maps to empowerment materials and tools for transformation'.

I began teaching this stuff internationally about 13 years ago... then on line about a year ago at www.theheroseries.com. It works! If you are tired of seeing the world's precious resources depleted, can't run any faster on the treadmill, or realise that more does not equal happier, please come to these presentations with these amazing mentors and myself (Susie Anthony). It will open your life to greater understanding and happiness, healing, opportunity and purpose.'

Peace doesn't just happen. It is crafted in the hearts, minds, and actions of ordinary people like you and I. The Super Hero Code is a collection of truly powerful, inspirational and cutting edge teachings, which if lived will lead us down the path of peace, which our world so desperately needs. The Super Hero Code contains a much-needed message of vision and hope... the wisdoms so masterfully shared about the art of conscious mythical living literally penetrate to the heart of how to rise beyond fear and conflict.

The Super Hero Code On Line Interviews...

Susie manages to convey and restore in us all... a magical truth, that in all the world, there is nothing more powerful than a single soul who has reconnected to the super hero inside. And whatever this super heroic soul achieves lifetime after lifetime, through listening to his or her intuition, being willing to buck the system, speaking inconvenient truths, making the sacrifices and taking the risks, this truly uplifts the rest of humanity and changes our world.

The Code interviews and Workshops are totally personal and collective solutions focused - so people feel uplifted and inspired and that keeps them coming back for more, even if they don't get the messages at first - they just feel good and keep coming back, and then they get it!

Susie does not restrict the term 'super hero' to warrior or life-saver; she uses it to describe anyone who has had the courage to follow his or her calling, obtained the necessary knowledge and skills, and then used that wisdom and experience for the benefit of his or her people and the planet.

Susie says, 'I have chosen people who have consistently demonstrated a feeling for beauty, the courage to take risks, the discipline to tell the truth, the capacity for sacrifice. Ironically, in some cases these virtues made them vulnerable; they were wounded but like true heroes they never gave up and were never destroyed. This is what The Super Hero Code is all about...'

About Dr Jude Currivan

Dr Jude Currivan has a Masters Degree in Physics, a PhD in Archaeology and was until the mid-1990s an international business leader.

She has researched consciousness for many years and had numerous mystical experiences since childhood. She has journeyed to nearly seventy countries and worked with the wisdom keepers of many traditions.

Her world-wide service aims to raise awareness and empower transformational change and she is the author of The 8th Chakra, The 13th Step, CosMos, co-authored with Dr Ervin Laszlo and HOPE – Healing Our People & Earth. She was presented with the 2010 CIRCLE award by Won Buddhism International and sponsored by the United Nations cited for her 'outstanding contribution towards planetary healing and expanding new forms of consciousness.' And in 2011 Jude was invited to become one of the worldshift20 council of visionary leaders (www.worldshiftcouncil.org).

In addition to exploring The Code, Jude will be sharing her understanding of the themes from her new book 'HOPE- Healing Our People & Earth' including healing our collective traumas - and how everyone can fulfil their highest purpose and step into their empowered wholeness to share and to thrive...

Praise for Dr. Jude Currivan and her work:

"Jude is an electrifying speaker, flowing with knowledge and wisdom. Her enthusiasm and understanding of the importance of the information that she is sharing are at the forefront of her presentation. Jude is able to completely integrate her heart and mind centre, communicating very complicated concepts in a fashion that enables the audience to understand."

Cameron and Glenn Broughton,
Co-Directors Earth Spirit Conferences, Vermont USA .

"HOPE by Dr Jude Currivan is a work of extraordinarily relevance and timeliness. To paraphrase Voltaire, "if HOPE did not exist, it would be necessary to invent it." The challenge now is to spread its message widely and to engage people everywhere in its essential wisdom."

Ervin Laszlo,
Philosopher and Futurist & Chris Laszlo, Sustainability Strategist.

"Jude Currivan is one of the most gifted speakers I have come across. She is one of those rare people who has information at her fingertips – sometimes quite complex scientific data – yet seems to speak from the very core of her being. "

Sue Sheridan,
Chairman of The Gatekeeper Trust, UK.

"Jude's message and personal example of hope and compassionate engagement is especially important and inspiring as we face the converging crises before us. She has a unique ability to help us see beyond the surface level and to deepen our commitment to inner and outer personal, collective and planetary healing."

Robin Haines Johnson,
Co-Founder and CEO of Greatmystery.org.

"Jude's latest riveting book helps us to understand how fear based events down the centuries have collectively brought us to a crucial crossroads in our evolution. Brilliantly researched and written, HOPE offers us ways to heal past traumas and thus help birth a potentially stunning future.... A must read for anyone who takes their spiritual path seriously."

Hazel Courteney,
Best- selling Author of 'Countdown to Coherence'.

About Dr Susie Anthony

PUTTING THE WISDOM BACK INTO WORKSHOPS

"We don't really learn about courage, wisdom and compassion from reading a book... we learn it by being in the lion's mouth!"

Think about comic book Super HEROES... they began life as ordinary people, who then 'somehow' acquire incredible powers, usually after something pretty diabolical happens to them: Their parents are murdered, they are blinded by toxic chemicals, bitten by a radio-active spider, jettisoned into space and land on earth after their home planet is completely destroyed, or perhaps they're 'chosen' by visitors from other worlds to inherit a special 'gift'... Then usually comes a time of no distraction - a retreat from everyday life, they find a mentor and like minded others, they often have to study and train hard to refine their new abilities before they share these with the rest of humanity. In all cases the tragedy marks the beginning of their new lives as Super HEROES with exceptional abilities of great courage, extraordinary wisdom and remarkable compassion, qualities they never knew they had.

This compelling, ground-breaking synthesis of edutainment pioneers a new style of learning with storytelling coming straight from the lion's mouth, with ordinary yet truly remarkable people who have learned how to stop playing small, to conquer fear, to become their Super HERO best selves and fly! People don't like lectures but they love listening to stories and they'll love this."

Award Winning Author.
